

SATRO Research Work Placements

Are you a 6th Form student passionate in one or more of the following subjects—Science, Technology, Engineering, Maths and related subjects e.g. design, environment, geography and psychology?

Spend some of Summer 2021 working with one of our research partners to produce an innovative research project related to the applications and use of STEM. Due to restrictions, interactions will take place remotely allowing all students to actively participate. Students will have access to guidance videos and the opportunity of a mock interview.

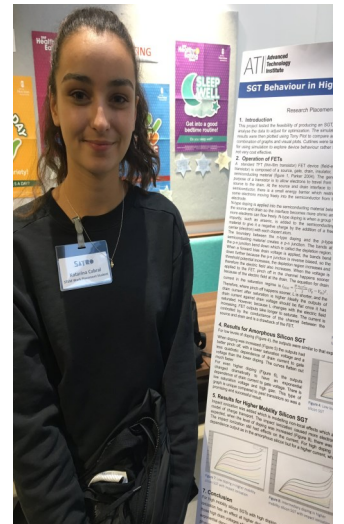

What do I get out of it?

The chance to work with and be inspired by professionals, scientists, technologists and engineers and a great way to enhance your UCAS form and personal statement. It's also an opportunity to learn skills in preparation for University. **If COVID restrictions allow, there could be the opportunity to visit your providers work place.**

Multi-national businesses and consultancies offer placements, including Applied Network Solutions Ltd. CGL, Imperial College, WSP, TRUEinvivo, and the University of Surrey.

All final research projects will be presented back to the provider for judging and the winners and runners up will receive an award, for the most inventive research project. There will also be an opportunity for students to showcase their work to all providers, parents, funders and others who join us for the virtual awards evening.

At the end of 4 weeks, we ask you to write up your project and submit it for a Gold Crest Award which looks great on your UCAS form and CV.

Who can apply?

We are looking for Surrey 6th Form students (year 12) mainly studying an A Level or Level 3 BTEC in Science, Technology, Engineering, Maths, or related subjects.

You need to be available over the Summer, either for two full weeks or the equivalent part-time over a four week period.

The application needs to be supported by a teacher.

It is completely free to participate in this programme and bursaries may be available to help with IT or travel costs if appropriate.

66 Providers

“My student appeared very interested in what I had to say and this was reflected in his excellent work.”

“It was great, I think with the report and presentation submissions we were able to give students a chance to get comfortable with discussing and writing technical content.”

Sound of interest?

If you can bring your commitment and passion to the research project during Summer 2021, apply today! Click [here](#) to complete the application form.

There will be a number of projects for you to choose from and we will help match you with an appropriate provider based on your interests.

66 Students

“It taught me important lessons about research that I will without a doubt carry with me through university.”

“It helped my UCAS application and gave me some research skills.”

“It was a useful way to fill my summer and allowed me to learn new skills such as referencing.”

“It helped me with my time management and independent research skills—I now feel far more confident in carrying out independent research projects, and I think this will be especially useful when I go to university. The continual feedback throughout the process really helped with this.”
